Horizon is a hosted business telephone service that resides in the cloud rather than your office. It provides an extensive range of fixed and mobile telephony capabilities accessed through an easy-to-use web portal. The service allows you, the administrator, to easily manage your environment whilst enabling your employees to maximise their productivity.

Horizon has many business features with an emphasis on control and administration through the web that takes the burden away from your IT team. The system can quickly be configured according to your organisation’s changing requirements, while your employees can manage calls easily and effectively. With only a minimal capital outlay required, a reliable and proven service and a jargon-free approach to telephony and communications, Horizon is suitable for any size business looking to improve its productivity and image.

**Easily control your fixed and mobile telephony**

**Features you can easily control**

Horizon puts you in complete control of your phone system and comes with an extensive range of call handling and management features, all operated through an easy-to-use web interface.

**One number anywhere**

Horizon integrates your fixed and mobile capabilities so that you never miss a call. Callers need only dial one number to reach your desk phone and mobile phone simultaneously; ongoing calls can be moved seamlessly from one device to another without hanging up and a single voicemail box can be accessed from any device.

**On-demand service with no hidden costs**

As Horizon is hosted on your behalf, you only pay for what you need on a simple per-seat basis. As you’re not buying a PBX, there’s no major hardware investment and no financing costs to consider.

**Lower call costs**

Horizon offers all the cost benefits of IP telephony including free site-to-site calls and cheaper call rates. If you use Horizon together with our mobile services you benefit from free calls between your fixed and mobile devices.

**Enables flexible working**

Horizon helps businesses become more efficient by enabling flexible work environments through hot-desking, home working and extending the service to mobile devices.

**Number choice**

You have total flexibility with the numbers you want to use. You can keep your existing numbers or get new numbers. Extend your business reach and use any local area number no matter where you are located. Have a London number in Leeds!

**A business continuity solution**

Unexpected events such as snow, floods, strikes or utility roadworks won’t disrupt your business. Because Horizon sits in the cloud, the service provides business continuity features that allow your organisation to carry on making and taking calls, whatever the circumstances.
What makes Horizon different?

Premium handsets plus desktop and mobile clients
Horizon provides high standards of phone interoperability with its useful desktop and mobile clients plus a choice of premium handsets from a range of manufacturers.

An easy-to-use web interface provides feature control and valuable user information
With an experienced in-house software development team, we can provide a positive user experience for both service and performance monitoring.

The Gamma network - reliable and secure
We lead on quality of service, scale and reliability, and we can easily and quickly transfer your existing phone numbers onto the Horizon platform.

Broadsoft call controller platform
Sitting at the heart of Horizon is the world’s leading call controller platform from Broadsoft, supporting millions of business users and providing the widest set of features while focusing on delivering the best user experience in unified communications.

How does it work?

Easy to use interface
Horizon provides a broad range of call handling features that are accessed via the web. The dashboard gives you convenient access to information such as your call history, voicemail and recorded calls. Personalised settings are quick and easy to set, ensuring your calls are handled effectively.

Call Recording
Record inbound or outbound calls for compliance, customer service or audit purposes. This optional feature allows secure online access to file storage and retrieval of call details. You can set Horizon to record some calls, all calls or record calls on demand.

Administrator Interface
Horizon provides IT managers with a powerful administrative management capability while giving employees freedom to control calls quickly and effectively. Set up is quick and easy and you can choose to pass down control to the user or you can retain control of the individual user features.

Auto Attendant
You can use Auto Attendant to provide callers with call routing options for different areas of the business or create announcements to inform callers of details such as opening hours and website address when the office is closed.

“Over 81% of employees use more than one device to help them work”

Connect - Driving mobility in your business

Connect offers your business the power of both your desk phone and your mobile device, integrating Horizon with our Gamma mobile service. This optional services allows you to access a range of features anytime, anywhere, regardless of device. In streamlining your business communications, you’re able to provide your staff with the flexibility to work wherever they are and ultimately improve overall business productivity and customer service delivery.

If your business relies on a mobile workforce, you’ll find Connect a great asset. It’s easy to use, can be adopted incrementally and at your own pace. With a simple price per user, you’ll also benefit from having just one provider and only paying for what you need.

By combining the flexibility of a mobile device with all the business-class features of Horizon, Connect makes your team more productive, your customer service more responsive and your costs more controllable.

The MyConnect companion app provides an enriched experience.

Key features

- A truly converged fixed and mobile feature set
- Use the native dialer to make calls
- One number across all devices
- Present your landline number from your mobile
- Record all business calls, even when mobile
- One voicemail system for all your calls - pick up and respond to messages from any location
- Call reporting for all calls made, received or missed across all devices
- Single web portal - to manage both Horizon and mobile devices

Soft Client

If you don't currently have Gamma Mobiles and are still in contract with another provider, don't worry. You can still bring the power of Horizon to your Windows or Mac desktop, laptop, Android or iOS device.

The Horizon Desktop Client option lets you connect your office phone to your preferred business device, such as a laptop or PC. It works seamlessly with the Horizon service and mobile client to ensure that you can control your user account and handle calls efficiently, wherever you are. The Desktop Client provides a new way to interact with Horizon and, using existing devices, you can reduce the cost of entry to a hosted solution, as well as minimising telephony costs incurred whilst on the move or in different locations.

New features such as Presence and Instant Messaging add to the core Horizon services and provide an informed way of communicating with your colleagues, as well as giving you a new route to gain immediate responses when it might not be convenient to speak on the telephone.

The Android and iOS Apps enable users to make and receive calls on a mobile device, as well as providing access to key settings for their service. It provides all the same functionality as the desktop client above, with the exception of Click to Dial and Group Chat. This is an ideal bolt-on for users who often work remotely or who are regularly on the move and need access to Wi-Fi.

Reduce the cost of entry to an IP hosted service by using the desktop client as a softphone and simply adding a headset
Reduce telephony costs when on the move or in temporary access points such as hotels and customer premises
Monitor your favourite contacts’ presence status to check their availability to take calls or to communicate with you
Send an instant Message to get an immediate response from a colleague when their presence status tells you it might not be convenient for them to take a voice call
Connect customers who use other messaging services to your company so you can quickly communicate with them and build a new route for direct customer support
Directly control your user account to implement Call Forwarding, Do Not Disturb or other call features
Horizon Integrator

Open up even more of Horizon’s capabilities across your desktop with Horizon Integrator, a powerful piece of software that gives you control of your Horizon service from your desktop without having to log in to your Horizon portal.

It also provides interaction with key programs such as Microsoft Outlook® and Skype® for Business. Our CRM Integrator can be added to enable easy integration with your CRM program, in addition to the full set of features Horizon Integrator offers.

Features

- Call Preview: Available from Outlook. Allows Horizon users to prepare for the incoming call and respond appropriately. This can make the caller feel more welcome and gives a more professional feel.
- Click to Dial: Available from Outlook and web pages. Makes Horizon even simpler to operate as users can make calls instantly and accurately from the information on their screen.
- Skype® for Business integration: Presence changes to reflect On A Call or Do Not Disturb. Improves efficiency as colleagues and customers can only contact you when you are available.
- Desktop Control: Instant access from the desktop to Call History, Call Forward, Presence and other features.

Integrator CRM

Integrator CRM takes the Integrator software a step further. Compatible with over 20 of the top CRM packages including Salesforce and Microsoft Dynamics, Integrator CRM helps users to be even more efficient and productive by providing quick access to contacts and the ability to dial directly from your CRM system.

Receptionist Console

Manage incoming calls and call routing to single or multiple sites via a simple, easy-to-use interface.

Horizon Receptionist Console adds a low-cost way of managing your key call routing and monitoring of multiple contacts or sites, where this is not achievable through a more traditional phone and side car solution. It ensures that every one of your calls is answered professionally and efficiently, improving customer service and increasing business efficiency.

Features

- Full control over incoming calls to single or multiple sites, ensuring every call is answered or redirected, as required.
- Access and monitor up to 800 directory contacts - call routing decisions can be made quickly and efficiently to ensure the best available outcome.
- Monitoring and manipulation of call queues with caller priority.
- Establishment and management of multiple conference calls, connecting key contacts and resources to deal with incoming queries effectively.
- Multiple receptionists managing single or multiple numbers.

Horizon Call Centre

Horizon Call Centre is a cloud-based service with an extensive range of inbound call centre capabilities that can be configured and managed via an easy-to-use web portal. This add-on service enables businesses to easily manage their call centre environments, boost productivity of call centre agents and the efficiency of their call centre and helps them deliver first-rate customer service.

Horizon Call Centre is ideal for any business that receives inbound calls to sales teams, help desks, accounts, receptionists or customer service representatives, right through to more formal inbound call centre environments.

Features

- Intelligent call distribution - ensures calls are answered efficiently and get through to the right people.
- Quality caller experience - easily monitor inbound call activity, with ‘barge-in’ and emergency escalation when needed.
- Enable flexible working - as Horizon is cloud-based, agents can be based anywhere. Users can easily take calls from multiple departments from one device.
- Quickly escalate difficult customer queries - for those times when agents need support from more senior staff.
- Gain valuable insight - access to historical and real-time data to help address training needs and identify potential gaps in resource during peak times.
- On-demand, scalable service - customers only pay for what they need and can scale up or down when needed.

Management Reporting

Do you know how many calls you are getting, how they are being handled or who is handling them? Horizon offers a number of key measurements through its reporting section. However, there is a growing requirement for more in-depth call management reporting and wall board integration to help organisations gain a real-time understanding of calls.

Through our partnership with Akixi, the leading hosted call-management service provider, you can now get a data feed for your Horizon service, which will let you export the statistics you need to help manage your business.

Features

- No server on site - Enables multi-site monitoring and supports business continuity.
- Real-time stats - Provides wallboards with real-time call-traffic information and alarms to ensure critical routes into the business are constantly monitored.
- Accessibility - Use the service from any internet-enabled device in your office or on the move.
- Push reporting and alarms - Customisable to ensure business-critical metrics are always available.

Benefits

- Instantly see what needs to be changed to improve customer service.
- Monitor time to answer and manage calls more efficiently.
- Analyse internal call patterns.
- See how many calls are being abandoned with the ability to return them.
- Optimise resources by ensuring the right number of operators are always in place.
