

Public Sector Frameworks

Overview - Version 10

July 2023

Framework

Introduction

The importance of purchasing frameworks to the public sector cannot be over-estimated.

Through short-lists of pre-qualified suppliers, and standardised and simplified procurement processes, they reduce the costs and risks faced by organisations such as local and central government, charities, healthcare, schools, councils and housing associations that are buying voice and data services.

Gamma is among the most widely accredited unified communications suppliers, already short-listed on a large range of frameworks and framework equivalents.

Which Frameworks are we on?

Gamma is a leading provider of Unified Communications as a Service (UCaaS) into the UK, Dutch, Spanish and German business markets, supplying communication solutions via our extensive network of trusted channel partners and also directly.

The combination of network investment, a digital-first approach and in-house development skills has enabled Gamma to develop a comprehensive portfolio of communications services with a significant amount of intellectual property, which has given us a heritage of disrupting the market with innovative and market-leading cloud-based services such as SIP Trunking and Hosted PBX in the UK.

Working smarter, together.
